

FOR IMMEDIATE RELEASE

**Fuse.Cloud Recognized by Fortune Magazine as One of the Fastest-Growing
Inner City Companies in America**

Initiative for a Competitive Inner City (ICIC)'s Awards Businesses Thriving in Urban Centers

Jackson, Miss - October 4, 2017 - Fuse.Cloud, a Jackson-based business technology provider, has been recognized in Fortune Magazine as one of the fastest-growing companies located in America's inner cities. The list, known as the Inner City 100, was announced last night at the 19th annual Inner City 100 Conference and Awards ceremony in Boston, organized by the Initiative for a Competitive Inner City (ICIC). The winners were chosen based on growth revenue over a five-year period. Fuse.Cloud was ranked 85 on the list with a five-year growth rate of 78.33 percent.

ICIC is a non-profit organization founded in 1995 by Harvard professor Michael E. Porter. This award places Fuse.Cloud among an exclusive group of America's most promising businesses leading efforts to contribute to the local economy by growing their businesses inside the city.

Inner City 100 companies exemplify economic opportunity, optimism and transformation in their communities. Providing a platform for recognition, networking and learning, the Inner City 100 program continues to open doors for other budding urban entrepreneurs and stimulate inner city business development and job creation.

Since 2006, Fuse.Cloud has grown to serve thousands of businesses throughout the United States by providing voice over IP (VoIP), high-speed fiber internet and other cloud-based services. Fuse.Cloud accepted the award at the ICIC Annual Conference and Awards Ceremony yesterday in Boston. "By growing our business in downtown Jackson, we can invest in job creation and the overall economy of the city and the metro area," said Fuse.Cloud founder and CEO, Gary Watts. "We are very honored to be included on this list." The Inner City 100 list was published in Fortune Magazine today.
